Separate paging is given to this Part in order that it may be filed as a separate compilation

## PART III—SECTION 2

### Notifications and Notices Issued by the Patent Office relating to Patents and Designs

#### THE PATENT OFFICE Patents and Designs

##### CORRIGENDUM

Calcutta, the 1st February 1958

In the Gazette of India, Part III, Section 2, dated the 25th January 1958 under the heading Renewal Fees Paid:—

Delete the No. 46965.

&

Insert the No. 36965.

#### Application for Patents The 15th January 1958

The dates shown in crescent brackets are the dates claimed under Section 78A of the Act.

62859. Ciba Limited. Pharmaceutical preparations containing new dehydrosteroid. (Divisional date 3rd July 1956).

The 16th January 1958

62860. Automatic Telephone & Electric Company Limited. Improvements in closed-chain hunting circuits. (19th January 1957).

62861. United States Atomic Energy Commission. Uranium recovery from alloys.

62862. Kooperativa Forbundet Ekonomisk Foréning. Packing arrangement for objects enclosed in a band provided with compartments.

62863. R. R. Keller. Improvements in light-diffusing structural panels.

The 17th January 1958

62864. Garware Finance Corporation Private Limited. An improved thermoplastic liner for crown corks and the like.

62865. M. S. R. Prem Raj. Cylinder type Rehat, Lift irrigation from well.

62866. C. A. Parsons & Company Limited. Improvements in and relating to fuel elements for nuclear reactors. (18th January 1957).

62867. N. V. Philips' Gloeilampenfabrieken. Improvements in or relating to a method of manufacturing incandescent lamps.

62868. N. V. Phillips' Gloeilampenfabrieken. Improvements in or relating to methods of producing large-surface electrodes for electrolytic capacitors.

62869. N. V. Philips' Gloeilampenfabrieken. Improvements in or relating to electric incandescent lamps

62870. S. A. J. Liljendahl. A method of emptying water closet bowls and a water closet mechanism and plant for carrying out the method.

62871. Ideal Industries, Inc. Electrostatically insulated coiler head mechanism.

62872. Ciba Limited. New heterocyclic compounds.

62873. Ciba Limited. New pyridine compounds.

The 18th January 1958 ...

62874. M. M. Suri. Improvements in and relating to fluid-mechanical transmission. (Addition to No. 60764).

62875. Tecalemit Limited. Improvements in flow control valves. (25th January 1957).

62876. Commissariat A L'Energie Atomique. Improvements in systems for handling articles inside a fluid-tight chamber.

62877. Commissariat A L'Energie Atomique. Improvements in methods of isotope concentration.

The 20th January 1958

62878. P. M. Mehta. New device for detecting overloading on motor trucks, rail wagons etc.

62879. P. A. Muller. Devices and methods of manufacturing tissue products formed of loose fibrous materials.

62880. Wurttbg Spindelfabrik G.m.b.H. Drawing mechanism for spinning machines. (30th September 1957).

62881. Wurttbg Spindelfabrik G.m.b.H. Brake for spinning and twining spindles. (20th September 1957).

62882. The General Electric Company Limited. Improvements in or relating to rotors for dynamo electric machines. (25th January 1957).

62883. The General Electric Company Limited. Improvements in or relating to stators for dynamo electric machines. (25th January 1957).

62884. Societe Genevoise D'Instruments De Physique. Machine-tool or measuring machine equipped with a device causing the automatic stopping of at least one of its movable members in predetermined positions.

62885. Dunlop Rubber Company Limited. Improvements in or relating to the production of sheet materials. (28th January 1957).

62886. Sigma Lutin Narodni Podnik. An improved stator design for electric machines.

62887. Chubb & Son's Lock And Safe Company Limited. Improvements in and relating to permutation locks. (12th February 1957).

62888. F. Hoffmann-La Roche & Co. Aktiengesellschaft. Method and composition of matter for combating plant diseases.

62889. Motoren-Werke Mannheim AG vorm. Benz Abt. stat. Motorenbau. Improvements in light weight metal cylinder heads for internal combustion engines.

62890. Council of Scientific and Industrial Research. A new process for the production of 4-hydroxycoumarin and its derivatives.

The 21st January 1958

62891. Societe Des Usines Chimiques Rhone-Poulenc. New phenothiazine derivatives and processes for their preparation.

62892. Canadian Ingersoll-Rand Company, Limited, and Bird Machine Company. Screening device.

62893. Hickson & Welch Limited. Improvements in or relating to optical whitening agents. (1st February 1957).

62894. Fisons Pest Control Limited. Agricultural Chemical compositions. (6th February 1957).

62895. Constock Liquid Methane Corporation. Method and apparatus for liquefaction of natural gas.

62896. Imperial Chemical Industries Limited. Process for improving the water-repellency of textile materials. (1st February 1957).

62897. Imperial Chemical Industries Limited. Pharmaceutical compositions. (30th January 1957).

62898. J. R. Geigy A.-G. Process for the production of tetra-acetyl mucic acid diamides.

62899. The Goodyear Tire & Rubber Company. Improvements in copolymers.

62900. The British Drug Houses Limited. Improvements in the preparation of organic compounds. (25th January 1957).

62901. J. A. Crabtree & Co. Limited. Improvements in and connected with electric switches. (7th February 1957).

62902. C. A. Parsons & Company Limited. Improvements in and relating to nuclear reactors. (22nd January 1957).

62903. Metropolitan-Vickers Electrical Company Limited. Improvements in and relating to dynamo-electric machines having forced lubrication. (1st February 1957).

62904. C. A. Parsons & Company Limited. Improvements in and relating to gas circulatory means. (30th January 1957).

62905. Kalyan Kumar Banerjee. A device for the manufacture of prestressed concrete pole.

62906. Kalyan Kumar Banerjee. Deck slab consisting of precast concrete joists and troughs and in-situ concrete.

62907. Kalyan Kumar Banerjee. Concrete pipes prestressed to form poles.

62908. Davidson & Company, Limited. Improvements in or relating to axial flow fans and the like. (23rd January 1957).

62909. International Chemical Company Limited. Improvements in or relating to dentifrices. (22nd January 1957).

62910. Metropolitan-Vickers Electrical Company Limited. Improvements in and relating to pantograph current collectors. (22nd January 1957).

62911. Ciba Limited. New Benzimidazoles and a process for their manufacture.

62912. Swissco Sales Corporation. Improvements in or relating to expandable bracelets for wrist watches.

62913. Godfrey L. Cabot, Inc. Improvements in polymers of ethylene.

62914. S. L. Venkiteswaran. Improved twin double effect distillation process for manufacture of absolute alcohol.

#### Alteration of date

57924. The claim to priority date 18th July 1955 has been abandoned and the application dated as of 17th July 1956, the date of filing in India.

58228. Post-dated to 8th June 1957 under Section 5 of the Act.

58296. The claim to priority date 1st September 1955 has been abandoned and the application dated as of 31st August 1956, the date of filing in India.

59655. Ante-dated to 17th July 1956 under Section 5 of the Act.

#### Applications Accepted

Notice is hereby given that all persons interested in opposing the grant of patents on any one of the applications referred to below may at any time within four months of the date of this Gazette of India give notice to the Patent Office in the prescribed form No. 6 of the Indian Patents and Designs Rules, 1933 of such opposition.

A limited number of printed copies of the specifications in the following list will be available for sale from the Government of India Book Depot, 8, Hastings Street, Calcutta in due course. The price of each specification is Rs. 2 (postage extra, if sent out of India). Requisition for the supply of printed specifications should be accompanied by the numbers of specifications as shown in the following list.

If required typed copies of the specification together with copies of drawings, if any, can be supplied by the Patent Office on payment of the necessary charges which may be ascertained on application to the office.

The dates shown in crescent brackets are the dates allowed under Section 78-A of the Act.

57248. Walzwerk Neviges, Willy H. Schlieker & Co. Process and apparatus for improving the qualities of sheet metal for use particularly in electrical equipment. Accepted on 18th January 1958.

*The sheet after it is rolled, is subjected to magnetisation all along its length in the course of its process of manufacture.*

57924. Austland Limited. Improvements in or relating to the breaking of solid material by blasting with compressed gas. Accepted on 16th January 1958.

*First compressor remotely situated from the location is connected to a second compressor, the second compressor compressing the medium to a pressure considerably higher than the first one.*

57941. The Tentor Steel Company Limited. A method of processing steel bars, especially reinforcing steel. Accepted on 17th January 1958.

*Cold twisting and cold stretching a steel bar during the processing zone between two gripping devices.*

58018. H. Jetha. Improved drum and barrel printing machine. Accepted on 21st January 1958.

*Consisting of two frames one above the other, a spring loaded frame hinged at one end of upper frame and other end provided with locking handle, guide rails provided to latter frame in which stencil frame slides, a spring loaded frame fitted with squeeze mechanism pivoted on upper frame, pivoted mounted lever with connecting arms connected with pivoted frame, lower frame having rails, and a frame carrying drum supporting mechanism, sliding on latter rails, of two adjustable arms, each with adjustable grip to slide vertically tube on frame and carrying arms with ball bearing wheel on which a drum get supported and rotate with motion of stencil frame.*

58068. Farbenfabriken Bayer Aktiengesellschaft. Process for producing water-insoluble brightening agents. (8th August 1955). Accepted on 21st January 1958.

*Heating water-soluble brightening agents containing acid groups with compounds having a molecular weight of 500—10,000 containing basic groups.*

58083. The Firestone Tire & Rubber Company. Improvements in or relating to wheel construction. Accepted on 20th January 1958.

*Drop center rim having bead seat extending outwardly axially and flat cylindrical surface, a pair of rings and spacer for variable wheel sparing.*

58139. Societe Des Usines Chimiques Rhone-Poulenc. Improvements in or relating to azaphenthiazine derivatives and their preparation. (26th June 1956). Accepted on 18th January 1958.

*An azaphenthiazine derivative is converted by known methods into 10-aminoalkyl substituted derivatives.*

58212. The British Thomson-Houston Company Limited. Improvements in and relating to electric lamps. (7th September 1955). Accepted on 21st January 1958.

*Comprising glass bulb flattened glass pinch sealed to close the bulb, lead wires brought through the seal, looped and returned to the seal, the loop portions of each lead wire being flattened down on to the pinch.*

58228. Shrimati Raj Rani Kumar. A new type of polish for all white footwear. Accepted on 20th January 1958.

Composed of powdered soap stone, calcium carbonate and solution of water and lint Terebinth.

58248. Klinger K.G. Process and apparatus for mixing or homogenising powdered material. Accepted on 20th January 1958.

Introducing compressed air at different pressures through separate annular zones at the bottom of the column of material to be homogenised.

58296. Rockitt & Colman Limited. A denture cleasing composition in tablet form. Accepted on 21st January 1958.

Comprising 99-30 per cent of water soluble cleansing composition and 1-70 per cent by weight of anhydrous alkali metal or alkaline earth metal or ammonium perborate.

68378. General Aniline & Film Corporation. Improvements in laminated fibrous glass material. Accepted on 20th January 1958.

Comprising sheets of fibrous glass material bonded together with a copolymer of N-vinyl pyrrolidone and a diallyl ester of dibasic acid.

58446. Nikunja Behari Das Gupta. Mechanical fan. Accepted on 21st January 1958.

Revolution of blades effected by one or more pairs of gears.

58523. James Mackie & Sons Limited. Improvements in stop mechanisms for textile machines. (29th September 1955). (Addition to No. 49485). Accepted on 17th January 1958.

A pivoted detector is employed and repeated engagement is brought about between the detector and the yarn, the detector normally moving out of contact with an abatement but makes a contact to stop when the yarn breaks.

58634. The Goodyear Tire & Rubber Company. Spring loaded grip such as for hydraulic brake controls. Accepted on 20th January 1958.

Teloscopically nested conical bushing force a coil spring about the rod between the conical bushing and a tubular nut.

58777. The British Cotton Industry Research Association. Improvements in and relating to the reduction and removal of dust at carding engines. Accepted on 20th January 1958.

Air exhausted from regions of junctions between main cylinder and flats at taken-in and. and between main cylinder and doffer cylinder.

59061. D. Napier & Son Limited. Control systems for multi-engine aircraft employing reaction jets. (14th December 1955). Accepted on 16th January 1958.

Device sensitive to a difference in speeds of engines automatically isolate from the common duct the engine whose speed falls below a pre-determined extent.

59089. G. W. Ruparel. Improved tower bolt. Accepted on 18th January 1958.

A half round channel, parallel sides extend and are bent at right angles to form a flange to extend downwards and bent at right angle to form outwardly projecting flange which is again bent at right angle and doubled up to form a curved lining to form a half round channel.

59134. Intertype Corporation. Centering and quadding mechanism for photocomposing machines. Accepted on 20th January 1958.

Comprising a line follower member urging row of character bearing elements towards end-wall, a first train of drive elements interconnecting following member and film holder and a second train of drive elements adapted to interconnect the follower member and film holder and means to disconnect first train and to connect second train of elements and vice versa.

59196. C. R. Ross. Block wall construction. Accepted on 16th January 1958.

Two parallel walls formed of blocks in staggered relationship and with interconnecting means to hold the walls together, the blocks having cylindrical cavities and locking pins.

59244. Technicolor Corporation. Developer and method of making dyed relief records. Accepted on 21st January 1958.

Exposing film to form latent image, developing it to form silver image and hardening it in region of developed silver, etching off unhardened film, and dyeing the relief record so produced, using hypo in developer to prevent film from being etched all the way through in the high lights.

59327. W. H. Miner, Inc. Draft gear for railway draft rigging. Accepted on 17th January 1958.

Resilient column composed of plurality of metal faced solid rubber units that are initially stressed in shear laterally.

59353. The Goodyear Tire & Rubber Company. Improvements in compound pressure cylinder for brakes. Accepted on 16th January 1958.

First fluid operated means adjusts brake shoe to take up the clearance relative to the other brake member and second means applies pressure.

59391. Farbenfabriken Bayer Aktiengesellschaft. Process for the manufacture of thermoplastic polycarbonate. Accepted on 18th January 1958.

Reacting di-(monohydroxy-phenyl)-substituted aliphatic hydrocarbons in which both hydroxy-phenyl groups are on same carbon atom with carbonic acid diesters phosgene or bis-chloro-carbonic acid esters of di-(monohydroxy-phenyl)-substituted aliphatic hydrocarbons.

59588. Timber Box Manufacturing Company. Improvements in or relating to bobbins. Accepted on 16th January 1958.

Reinforcement consists of one or more peripheral rings of fibre, plastic or synthetic rubber or like materials laminated with wooden flange.

59655. Imperial Chemical Industries Limited. New nitrogenous organic compounds. (2nd August 1955). (Divisional date 17th July 1956). Accepted on 17th January 1958.

Reacting benzthiazyl 2-sulphenamide with tert-octylamine.

59690. Farbenfabriken Bayer Aktiengesellschaft. Printing and dyeing compositions and method of treating textiles. (2nd January 1957). Accepted on 18th January 1958.

Using for the impregnation or as binding agents aqueous emulsions of self-cross-linking copolymers which carry in the polymer chain the grouping

$$-\text{C}(=\text{O})-\text{N}(\text{H}_2)-\text{OR}_2$$

wherein  $\text{R}_1$  denotes a hydrogen atom, an alkyl, aralkyl or aryl group and  $\text{R}_2$  denotes an alkyl group.

59844. Maschinenfabrik Augsburg-Nurnberg A.G. Improvements in overload protection couplings. Accepted on 21st January 1958.

Carrier having roller bodies mounted is pressed with the latter by a weaker spring bearing against driven shaft against driven coupling.

60223. Frederick Parker Limited. Washers of bulk material. Accepted on 17th January 1958.

Anularly-spaced ducts extending from peripheral channel in the feed ring to inner delivery ring are adapted to guide infed materials.

60247. J. Rochart. Ignition spark generating devices such as ignitors for explosive mixtures. Accepted on 16th January 1958.

Colloidal particles of metal constituting a layer in a hole in air insulating layer provides path between first and second electrodes.

60298. Sealed Power Corporation. Piston ring spacer and expander. Accepted on 21st January 1958.  
*Corrugations forming a circular series of outer crowns and a concentric circular series of inner crowns and slots between parallel spaced portions.*

60360. Ciba Limited. Method of making inscriptions on the surfaces of transparent structures. Accepted on 17th January 1958.  
*Inscription is formed by breaking up the area of the surface into small projections the projection having a raster.*

60552. Farbwerke Hoechst Aktiengesellschaft vormals Meister Lucius & Bruning. Process for the manufacture of ethylene imine compounds. Accepted on 21st January 1958.  
*Phosphoric acid amide dichloride is reacted with an ethylene imine.*

60630. Maurice Ravdell, Misha Ravdell and Leonard Maurice Stanton. Improvements in and relating to shock wrenches. Accepted on 17th January 1958.  
*Comprising a rotatable shaft, an impact receiving member rotatable with former and having at least one abutment face, an impact transmitting member brought into shock-delivering engagement with one of said abutment faces.*

60768. The British Thomson-Houston Company Limited. Improvements in rotary switch operating means. (5th July 1956). Accepted on 20th January 1958.  
*Gearing includes a 'Geneva' wheel and cam mechanism so that the motor actuates switch mechanism only during a small of each cycle of rotation.*

60779. The Jay Engineering Works Ltd. Electric ceiling fan. Accepted on 21st January 1958.  
*Frame employed to mount the motor at two points and from whose base or bottom depends a spindle for the blade assembly.*

60991. T. L. Seaborne. Valves for milking machines. Accepted on 20th January 1958.  
*Detergent is introduced into milk line first to pass via it to teat cups and return through the air line to releaser and means for restricting passage of returning detergent.*

61006. The Plessey Company Limited. Improvements in or relating to the manufacture of felt bodies from pulp. (5th July 1956). Accepted on 21st January 1958.  
*Dipping a porous felting form into and lifting it from a receptacle containing pulp wherein the bath is replenished in each cycle at a predetermined period of time.*

61019. Ciba Limited. Process for the manufacture of 1-aminopyridone-(2) compounds. (17th July 1956). Accepted on 20th January 1958.  
*Treating N-unsubstituted pyridone (2) compounds with N-halogen amine.*

61196. Union Carbide Corporation. Method for making granular thermoplastic resins of high bulk density. Accepted on 16th January 1958.  
*Agitating heated solution of Polymer in solvent with inert liquid to have polymer solution droplets therein evaporating the solvent and separating polymer particles from liquid.*

61223. Ciba Limited. Process for the dyeing of fibers of polyacrylonitrile. Accepted on 18th January 1958.  
*The dyeing is conducted in the presence of a quaternary ammonium salt containing at least two quaternary nitrogen atoms and at least one aliphatic hydrocarbon radical containing at least 8 carbon atoms.*

61341. Union Carbide Corporation, formerly known as Union Carbide and Carbon Corporation. Thermally insulated bulk storage container. (9th April 1957). Accepted on 21st January 1958.  
*A double-walled heat-insulated container, container provided with supporting means.*

61354. The Indian Oxygen & Acetylene Company Private Limited. Process and apparatus for the low temperature separation of air. (7th August 1956). Accepted on 16th January 1958.  
*Refrigeration is provided by evaporation of liquid methane.*

61459. G. Nebel. Continuously operating centrifuge. Accepted on 16th January 1958.  
*Plurality of sleeve walls arranged in polygonal formation, said sleeve walls being adjustable in their inclination relative to centrifuge axis.*

61494. Bundy Tubing Company. Improvements in or relating to the manufacture of tubing. Accepted on 18th January 1958.  
*Strip of stock with spaced side edges is placed in and the tube diameter is reduced to bring the side edges together.*

61494. Bundy Tubing Company. Improvements in or relating to the manufacture of tubing. Accepted on 18th January 1958.  
*Strip of stock with spaced side edges is placed in and the tube diameter is reduced to bring the side edges together.*

61552. The Prestige Group Limited. An improved fruit of vegetable peeling or cleaning machine. (11th September 1956). Accepted on 17th January 1958.  
*A receptacle provided with a hinged or removable cover, a horizontally disposed disc rotatably supported within receptacle to form vegetable chamber.*

61596. Takeda Pharmaceutical Industries, Ltd. Apparatus for continuously treating cereal grains. Accepted on 17th January 1958.  
*An inclined cylinder rotatable about its longitudinal axis and means for feeding grains and enriching solution in a predetermined proportion.*

61660. N. V. Philips' Gloeilampenfabrieken. Improvements in or relating to methods of producing magnet cores having hysteresis loops which approach rectangularity. Accepted on 21st January 1958.  
*A mixture of iron, magnesium, nickel and cobalt of particular compositions is shaped and heated between 1350° to 1450°C in an oxygenated atmosphere.*

61721. Shinko Denki Kabushiki Kaisha. Rotary shaft bearing device for a vertical motor for high speed spinning. Accepted on 20th January 1958.  
*The convex spherical band surface is formed in the inner ring of each of two bearings to bear a hollow rotary shaft for a vertical motor for spinning.*

61759. Marconi's Wireless Telegraph Company Limited. Improvements in or relating to wide band high frequency transformers. (15th November 1956). Accepted on 21st January 1958.  
*Comprises coaxial conductors connected in parallel at one end, connections connecting feeder lengths in series at the ends.*

61959. E. R. Armelin and A. F. G. Plaskett. Improvements in and relating to the folding of sheet material. Accepted on 16th January 1958.  
*Cutting groove of V-shaped cross-section in one face of sheet or web introducing adhesive into groove, folding sheet or web along line of apex of groove and causing or allowing the adhesive to set to form a rigid fold.*

61967. T. G. B. Motors Limited. Improvements in motor road vehicles. (17th October 1956). Accepted on 16th January 1958.

*Lever arm pivotally suspended from a carrier member, a resilient means tending to move the lever, a shock-absorbing means, and means for limiting the resilient means.*

#### Opposition Proceedings

The application for a patent No. 69377 made by Godrej & Boyce Manufacturing Company Private Limited in respect of which an opposition was entered by Steel Age Industries Private Limited as notified in Part III, Section 2 of the Gazette of India, dated 2nd November 1957, has been treated as abandoned.

#### Correction of Clerical Errors

(1)

Under Section 62 of the Indian Patents and Designs Act, 1911, certain clerical error occurring in Specification No. 548905 was corrected on 16th January 1958.

(2)

Under Section 62 of the Indian Patents and Designs Act, 1911, certain clerical error in Specification No. 54522 was corrected on 16th January 1958.

#### Patents Sealed

55710. 55803. 55830. 56389. 56451. 56469. 56497. 56505. 56510. 56522. 56542. 56614. 56623. 56697. 57077. 57142. 57211. 57463. 57510. 57612. 57622. 57630. 57740. 57765. 57766. 57769. 57947. 57954. 57957. 58013. 58028. 58088. 58090. 58132. 58137. 58155. 58160. 58166. 58180. 58250. 58432. 58783. 58822. 58826. 58860. 58910. 58924. 58940. 59249. 59412. 59533. 59600. 59620. 59631. 59679. 59791. 59900. 60031. 60071. 60086. 60103. 60105. 60237. 60280. 60359. 60400. 60527. 60787. 60881. 60904. 61227.

#### Renewal Fees Paid
